June 03- July 26, 2024

7:00 AM-6:00 PM

Operation Smart- Science

Using STEM principles and understanding how it impacts everything they do, Girls Inc. develops girls' enthusiasm for science skills through hands-on activities, observations, and experiments.

Operation Smart- Technology Program

Girls will become digital citizens as they learn to use computer hardware, software, and internet applications.

Operation Smart-Math

By interacting, creating, and using non-traditional methods, girls will develop an enthusiasm for and skills in math.

Mind & Body

Using mindfulness and nutrition as a guide, girls will develop positive body images while learning the nutritional benefits of healthy eating and food preparation.

Media Literacy

Girls will increase their awareness and the scope and power of the media and the effects of media on girls and women. They will create media that's realistic and reflects their lives.

Visual Arts

Creative skills are developed in girls through paint, clay, sculpture, and drawing.

Sporting Chance

Girls will build a foundation for enjoying sports and physical activity while building athletic skills and healthy habits.

Performing Arts

As the girls learn choreography and rehearse musical numbers for the end-of-summer showcase, they will combine the skills of music, dance, and step.
