Eureka! Teen Achievement Program

Eureka! is a cohort-based, year-round experiential learning program that engages and exposes girls in grades 8-12 to study in the areas of science, technology, engineering, and math (STEM). The program focuses on educational, personal, and professional development, and further complements these competencies by including programming for diversity, equity & inclusion, financial literacy, sports, physical fitness, and healthy living.

Why girls need STEM!

Worldwide, there is a gender gap in STEM. The Eureka! Teen Achievement Program seeks to decrease that gap by offering challenging, and engaging learning opportunities, and accelerated STEM education to teen girls. The Eureka! program provides a nurturing environment that encourages self-confidence and a curiosity for learning, that results in improved performance at school, and in the workforce after college graduation. The global workforce is fast-paced and ever-changing. Tomorrow's problems will be solved by experts who are fluent in Science, Technology, Engineering and Math (STEM). Eureka! graduates will lead the way.

Eureka! Students are:

- Accomplished- achieves goals and objectives in high school, college, and career
- Confident- demonstrates self-confidence in STEM
- Aware- recognizes that career opportunities for women in STEM are boundless
- Leaders- embrace leadership roles in education, career, and community
